Seeking Opportunities as Solutions Consultant

Customer-focused Solutions Consultant with a computer science degree and hands-on experience in AI implementation, data management, and client-facing communication. Experienced at translating complex technical concepts into actionable solutions for diverse audiences. Former student-athlete that understands hard work and team focused environments. Skilled at technical discovery, AI workflows, solution implementation and client onboarding.

Relevant Experience

Data and Events Management Intern | Sports Recruits | New York, NY June 2023 - August 2023

- Managed and transformed datasets of over 1000+ records using formulas and functions such as XLOOKUP
- Responded to customer inquiries and resolved issues to enhance customer satisfaction and deliver a positive client experience

Legal Summer Intern | Pfizer, Inc. | New York, NY June 2022 - August 2022

- Analyzed internal datasets to uncover patterns and recommend process improvements
- Researched and built a database containing information from competitor SEC filings
- Participated in cross-functional development programs, building teamwork, communication, and leadership skills, while connecting with multiple members of the Legal Department through intern-led interviews

Additional Experience

Personal Trainer and Group Fitness Instructor | Level Fitness | Yorktown, NY November 2024 - Present

- Led discovery sessions with prospective and current clients to identify goals, constraints, and success criteria, then translated findings into customized, actionable solution plans
 - Managed a portfolio of 10+ active client accounts simultaneously, driving \$10,000+ in revenue through consultative needs assessment and tailored solution delivery
 - Owned the full client engagement lifecycle, from onboarding and requirements gathering to iterative solution adjustment based on stakeholder feedback, ensuring alignment with individual client objectives
 - Delivered technical and conceptual training content to audiences of 10–25, adapting communication style and depth to match varying levels of prior knowledge
-

Projects

Portfolio Website | [Portfolio](#)

- Built and deployed a personal portfolio site using GitHub copilot as an AI pair-programming tool, showcasing live demos of hands on technical projects
- Utilized Vercel for hosting/deployment, reflecting familiarity with modern web deployment workflows

TrainTrack *(live demo on portfolio site)*

- Identified a workflow gap in personal training client management and designed a solution: a React-based multi-tab dashboard covering scheduling, client tracking, periodization planning, and guided workout sessions
- Used Claude's development environment to accelerate build cycles, working through technical challenges (e.g., a Babel/JSX transpiler issue) to ship a functional, demoable application

Project_Neon *(playable on portfolio site)*

- Designed and built a fully playable card-based combat game, including a faction loadout system with hybrid resource-cost mechanics and scaling economy logic
-
